Projects

Attribute-Aware Consistency Prompt Learning

- Proposed a lightweight extension to CoCoOp for improving prompt learning in vision-language models
- Introduced attribute-aware semantic descriptions and dual-branch consistency regularization

Arabic Bank Check Amount Extraction & Processing

- Developed a system to extract and process handwritten/printed Arabic monetary amounts from bank checks
- Performed dataset annotation as a preprocessing step for model training

Forecasting ESP Failures Using AI & ML Models (Senior Project)

- Built predictive models to forecast Electrical Submersible Pump (ESP) failures using historical operational data

EWS chatbot (RAG)

- Developed a chatbot that answers user queries about local emergency alerts using Early Warning System data
- Built a Retrieval-Augmented Generation (RAG) pipeline to ground responses in real alert data

Skills

Programming Languages:

Python, Java, JavaScript, PHP, HTML, CSS

Database Management:

MySQL, Supabase, MongoDB

AI Tools & Libraries:

PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, HuggingFace, CVAT

Other:

Git/GitHub, REST APIs, React, Node.js, Flask, Android Studio, Software Design Principles

Soft skills

- Problem Solving
- Quick to learn new languages and technologies
- Team Work
- Adaptability
- Leadership
